Projects

Web-Based POS and Inventory System

Capstone Project

- Developed a web-based POS and inventory management system using PHP, MySQL, HTML, CSS, and JavaScript.
- Designed and implemented a relational database for products, inventory, sales, users, and transactions.
- Implemented role-based access, sales processing, inventory tracking, reporting, and receipt generation.
- Integrated basic sales and inventory forecasting using historical transaction data.

Hotel Room Reservation System

Academic Project

- Developed a dynamic hotel room reservation system using PHP, MySQL, HTML, CSS, and JavaScript.
- Implemented user authentication, room reservation, and administrator approval functionality.
- Integrated the front-end interface with a MySQL database for storing and managing reservations.
- Performed system testing and troubleshooting to ensure reliable reservation processing.

SecureEntry – Visitor Management System

Academic Project

- Developed a web-based visitor management system with QR code generation and scanning functionality.
- Implemented secure visitor check-in and check-out using unique QR codes.
- Designed a database structure for visitor records, logs, and access tracking.
- Added real-time validation to improve the accuracy and efficiency of visitor entry management.

Skills

- **Programming:** Proficient in HTML, CSS, PHP, MySQL, and basic Python for developing database-driven web applications.
- **Web Development:** Experienced in building responsive interfaces, implementing CRUD operations, and integrating front-end and back-end components.
- **Database Management:** Knowledgeable in MySQL database design, relational structures, queries, and data management.
- **System Development:** Experienced in implementing authentication, role-based access, inventory, reservation, reporting, and validation features.
- **Testing & Troubleshooting:** Capable of testing applications, identifying errors, debugging issues, and improving system functionality.
- **Development Tools:** Proficient in VS Code and XAMPP for application development, local server setup, and testing.
- **Version Control:** Basic knowledge of Git and GitHub for source code management and project tracking.
- **Productivity Tools:** Proficient in Microsoft Office for documentation, data organization, reports, and presentations.
